GitHub: github.com/Rizwan7616 | Portfolio: rizwan7616.github.io/rizwan-portfolio

Summary

Computer Science graduate experienced in UI, API, and performance test automation using Java, Selenium, REST Assured, and Grafana k6. Reduced manual regression time from 8 hours to 3 hours at STARDUST Telecom. IEEE published, transferable Saudi Iqama, immediately available.

Technical Skills

Test Automation: Selenium WebDriver, TestNG, JUnit, PyTest, REST Assured, WireMock, Postman, Grafana k6, MockMvc, OpenAPI Validator, Page Object Model, Maven

Programming & Web: Java, Python, JavaScript, TypeScript, SQL, PHP, Spring Boot, React, MySQL, PostgreSQL, H2, Flyway, HTML5, CSS3

CI/CD & Cloud: GitHub Actions, Docker, Docker Compose, Trivy, Flake8, Git, GitHub, Linux, REST APIs, AWS EC2

QA Practices: Test case design, regression, API, contract, integration, and performance testing (smoke, stress, load), boundary value analysis, defect tracking

Languages: English (Fluent), Arabic (Conversational), Bangla (Native), Urdu (Fluent), French (Basic)

Professional Experience

STARDUST Telecom Ltd. **Dhaka, Bangladesh**

DevOps Intern – Software QA Automation *Nov 2024 to Jan 2025*

- Automated 90+ regression test cases across 6 enterprise ISP modules using **Selenium WebDriver**, **Java**, and **TestNG** with the **Page Object Model**, cutting manual regression time from 8 to 3 hours.
- Executed 12 functional and boundary test cases on billing and provisioning REST APIs in **Postman**, covering error handling and uncovering 5 defects.
- Tracked 8 defects through their full lifecycle and resolved 3 cross browser issues across Chrome, Firefox, and Edge.

Selected Projects

QA Automation Framework **2026** | **GitHub**

Java, Selenium, TestNG, REST Assured, WireMock, Maven, GitHub Actions

- Built a UI and API framework (**Page Object Model**) with 42 tests in **Selenium WebDriver**, **TestNG**, **REST Assured**, and **WireMock**; the suite runs on every push via **GitHub Actions**.

API Contract & Integration Testing Service **2026** | **GitHub**

Java 17, REST Assured, WireMock, Atlassian OpenAPI Validator, Maven

- Implemented automated contract verification with **REST Assured** and **OpenAPI**, enforcing schema compliance to prevent backwards-incompatible contract drift.
- Developed a 14-test suite using **WireMock** stubs for third-party dependencies to validate error-handling paths.

High-Throughput k6 Performance Engineering Framework **2026** | **GitHub**

Grafana k6, JavaScript, Smoke/Stress Testing, CI/CD

- Built a modular **Grafana k6** suite running smoke, stress, and multi-stage user journey tests against target endpoints.
- Defined automated SLA thresholds for latency (p95 $<$ 200ms) and error rate ($<$ 1%) with HTML reporting for deployment gating.

Containerized REST API with CI Pipeline **2026** | **GitHub**

Python, Docker, GitHub Actions, Linux

- Containerized a Python REST API (multi-stage **Docker**, non-root); **GitHub Actions** runs **Flake8**, **PyTest**, and **Trivy** vulnerability scans.

Spring Boot REST API with CI/CD Pipeline **2026** | **GitHub**

Java 21, Spring Boot, Maven, Docker, GitHub Actions

- Built a Spring Boot REST API with **JUnit** tests, containerized with multi-stage **Docker** and **Docker Compose**; **GitHub Actions** builds and tests on every push.

TeamFlow Enterprise Full-Stack Platform **2026** | **GitHub**

Java 17, Spring Boot 3, React, TypeScript, Flyway, H2, PostgreSQL

- Built a full-stack platform with **Spring Boot 3**, **React 18**, **TypeScript**, and **Flyway**, with an 8-scenario **MockMvc** and **H2** integration test harness and **GitHub Actions** CI/CD.

Education

Independent University, Bangladesh **Dhaka, Bangladesh**

B.Sc. in Computer Science and Engineering; Minor in Management Information Systems *2021 to 2025*

Certifications

IBM Applied DevOps | **Microsoft DevOps** | **Google IT** | **Google Cybersecurity** | **CCNAv7: Intro to Networks** | **Google AI**

Publications & Honors
