Summary

Junior QA Automation Engineer with a B.Sc. in Computer Science and Engineering and a Software QA & DevOps internship at an ISP software company. Skilled in test automation using Java, Selenium WebDriver, TestNG, and REST Assured, alongside hands-on experience with CI/CD pipelines, GitHub Actions, and Docker. Combines software quality assurance with automation and continuous integration practices to improve software reliability and delivery. IEEE published. Valid transferable Saudi iqama.

Technical Skills

Test Automation: Selenium WebDriver, TestNG, JUnit, PyTest, REST Assured, WireMock, Postman, Page Object Model, Maven
Programming & Web: Java, Python, JavaScript, SQL, PHP, MySQL, HTML5, CSS3
CI/CD & Cloud: GitHub Actions, Docker, Docker Compose, Git, GitHub, Linux, REST APIs, AWS EC2
QA Practices: Test case design, regression testing, API testing, boundary value analysis, defect tracking
Languages: English(Fluent), Arabic(Conversational), Bangla (Native), Urdu(Fluent), French(Basic)

Professional Experience

STARDUST Telecom Ltd. **Dhaka, Bangladesh**

Software Quality Assurance (SQA) Intern *Nov 2024 to Jan 2025*

- Automated 90+ regression test cases across 6 enterprise ISP modules using **Selenium WebDriver**, **Java**, and **TestNG** with the **Page Object Model**, cutting manual regression time from 8 to 3 hours.
- Executed 12 functional and boundary test cases on billing and provisioning REST APIs in **Postman**, covering error handling and uncovering 5 defects.
- Reported and tracked 8 defects through their full lifecycle (log, triage, retest, close) with developers, and resolved 3 cross browser issues across Chrome, Firefox, and Edge.

Projects

QA Automation Framework | *Java, Selenium, TestNG, REST Assured, Maven* **2026** | **GitHub**

- Built a UI and API automation framework using the **Page Object Model**, with 42 automated tests in **Selenium WebDriver**, **TestNG**, **REST Assured**, and **WireMock** for API mocking.
- Runs the full suite on every push through **GitHub Actions** CI.

Spring Boot REST API with CI/CD Pipeline | *Java 21, Spring Boot, Maven, Docker, GitHub Actions* **2026** | **GitHub**

- Built a Spring Boot REST API (Java 21, Maven) with status and health endpoints, covered by **JUnit** tests.
- Containerized it with a multi stage **Docker** build, **Docker Compose**, and a non root runtime, with **GitHub Actions** automating build and test on every push.

Containerized REST API with CI Pipeline | *Python, Docker, GitHub Actions, Linux* **2026** | **GitHub**

- Containerized a Python REST API using a multi-stage **Docker** build and a non-root runtime environment.
- Configured **GitHub Actions** to automate **Flake8** linting, **PyTest** execution, and **Trivy** container vulnerability scanning.

Skill Synergy: Education Platform | *PHP, MySQL, JavaScript, AWS EC2* **2025** | **GitHub**

- Developed a PHP and MySQL platform for sharing academic resources and grading, with 5 user roles and 8 database tables.
- Deployed the application on **AWS EC2** with a persistent **MySQL** database.

Education

Independent University, Bangladesh **Dhaka, Bangladesh**

B.Sc. in Computer Science and Engineering; Minor in Management Information Systems *2021 to 2025*

Certifications

IBM Applied DevOps | **Google IT Automation** | **Google Cybersecurity**

IBM Cybersecurity Fundamentals | **Google AI** | **CCNAv7: Introduction to Networks**
